

MOHAMED LOUAI BOURAOU

Digital Marketing · SEO, Web UX & Content

Tunis, Tunisia · +216 22 842 578 · louaibouraoui0@gmail.com · linkedin.com/in/mohamed-louai-bouraoui · portfolio2-med-louai-bouraoui.vercel.app

PROFILE

Digital marketer specialised in SEO, website user experience and content. For thirteen months I ran the entire digital presence of Worku, a B2B SaaS platform I co-founded: technical and on-page SEO, full website redesign, visual identity, content and social media. My background combines interface design (Figma) with digital marketing, so I build pages that are clear for visitors and structured for search engines, and I can carry out my own recommendations instead of only listing them.

EXPERIENCE

Digital Marketing Specialist | Worku (Linteern SARL) Aug 2025 – Sep 2026

B2B SaaS sourcing and contact-enrichment platform · Co-founded with two partners · La Marsa, Tunis · worku.tn

Master's end-of-studies internship (Esprit School of Business) completed within this role, Feb – Jul 2026.

- **Technical SEO:** diagnosed and fixed search engine access issues (Googlebot was being blocked), rebuilt robots.txt, submitted and validated the XML sitemap, and redirected legacy URLs left over from the old product.
- **On-page SEO:** restructured the site around search intent, one audience and one goal per page; rewrote title tags, meta descriptions, headings and internal linking across the whole site.
- **Website & UX/UI:** redesigned the interface and user journeys in Figma, created a new visual identity and design system, built dedicated pages for each type of client, and reorganised the mobile experience.
- **Web copy:** rewrote the site messaging and calls to action, moving from technical wording to clear, benefit-led copy written for the visitor.
- **GEO & AEO:** implemented JSON-LD structured data (FAQPage, Organization, SoftwareApplication, BreadcrumbList) validated with zero errors, and wrote FAQ content optimised for answer engines and AI search.
- **Content & social media:** defined a four-pillar editorial line and produced organic content for the company LinkedIn page in video, carousel and image-post formats.
- **Positioning & research:** repositioned the product after its pivot from an ATS to a sourcing platform; ran target-customer and persona research and competitor analysis.
- **Monitoring:** tracked indexing, coverage and page performance in Google Search Console, identified which pages and queries brought clicks, and adjusted content accordingly.
- **Scope:** owned everything the market sees: positioning, SEO, website, content and measurement. The product's technical side was built by the engineering team.

UX/UI & Graphic Designer | Tuni'AR Feb 2024 – May 2024

Remote · Internship

- Designed the UX/UI of the "Wash and Go" mobile app in Figma: user flows, wireframes, interface structure and visual design, with services and user profiles restructured for a clearer experience.

Web Designer | TANIT WEB Jun 2023 – Aug 2023

On-site · Internship

- Supported the redesign of the company website in Figma: research, wireframing and prototyping for clearer page structures and more intuitive navigation.

SKILLS

SEO: Technical SEO (robots.txt, XML sitemaps, indexing, redirects, crawl access), on-page SEO (title tags, meta descriptions, heading structure, internal linking), search intent mapping, SEO audits, GEO & AEO, JSON-LD structured data

Website & UX/UI: UX audits, user journeys, information architecture, interface redesign, wireframing and prototyping (Figma), visual identity, design systems, mobile optimisation, UX writing, CTA optimisation

Content & Marketing: Content creation (video, carousel, image posts), editorial strategy and calendar, SEO copywriting, LinkedIn company page management, B2B marketing, product positioning, customer and competitor research

E-commerce: WordPress and WooCommerce: site setup, product catalogue, product pages, publishing

Analytics: Google Search Console (indexing, coverage, performance, URL inspection, sitemaps), Google Analytics 4 (working level), KPI definition

Online advertising: Google Ads and Meta Ads: campaign structure, targeting, keywords, auction logic and performance indicators (CPC, CPL, ROAS); solid understanding of the mechanics, certification in progress

Tools: Google Search Console, GA4, Figma, Canva, WordPress, WooCommerce, Schema Markup Validator, Chrome DevTools, Git & GitHub, VS Code, Microsoft Office, AI tools (ChatGPT, Claude)

Languages: Arabic (native), French (fluent), English (professional)

ACADEMIC PROJECT

E-commerce website built with WordPress and WooCommerce: full site setup, product catalogue, product pages, layout and publishing.
