

MOHAMED LOUAI BOURAOU

Digital Marketing • SEO, Web UX & B2B Content

Tunis, Tunisia • +216 22 842 578 • Louaibouraoui0@gmail.com • [LinkedIn](#) • [Portfolio](#)

PROFILE

Digital marketer specialised in SEO, web user experience and B2B content. I led the complete overhaul of the digital presence of Worku, a B2B SaaS platform: technical SEO and indexing fixes, UX/UI redesign, pages restructured around search intent, structured data and LinkedIn content. My background combines interface design (Figma) with digital marketing, so I build pages that are clear for users and structured for search engines.

EXPERIENCE

Product & Growth | Worku

Feb 2026 – Jul 2026

B2B SaaS sourcing and contact-enrichment platform • Tunis, Tunisia • Full digital presence overhaul

- **Technical SEO** — diagnosed and fixed search engine access issues (403 to Googlebot), rebuilt robots.txt, submitted and validated the XML sitemap (14 pages accepted), and handled 13 legacy URLs through redirects.
- **On-page SEO** — restructured the site around search intent, assigning each page one audience and one goal; rewrote title tags, meta descriptions, headings and internal linking across 16 pages.
- **UX/UI** — redesigned the interface and user journeys, built a new visual identity and design system, created dedicated pages per audience (recruiters vs sales teams), and reorganised the mobile experience.
- **GEO & AEO** — implemented JSON-LD structured data (FAQPage, Organization, SoftwareApplication, BreadcrumbList) validated with zero errors, and built FAQ content optimised for answer engines and AI search.
- **Content & social media** — defined a four-pillar editorial line and produced organic LinkedIn content for the company page; community grew from around 120 to 537 followers.
- **Positioning & research** — repositioned the product after its pivot from an ATS to a sourcing platform; ran ICP and persona research, competitor analysis and lead-generation experiments.
- **Analytics** — monitored indexing, coverage and performance in Google Search Console; used GA4 for visibility checks and defined KPIs for ongoing measurement.

UX/UI & Graphic Designer | Tuni'AR

Feb 2024 – May 2024

Remote • Internship

- Designed the UX/UI of the “Wash and Go” mobile app in Figma, restructuring services and user profiles for a clearer, easier experience.
- Produced user flows, wireframes, interface structure and visual design, focusing on intuitive interaction and consistency across screens.

Web Designer | TANIT WEB

Jun 2023 – Aug 2023

On-site • Internship

- Supported the redesign of the company website in Figma, improving the interface and overall user experience.
- Contributed to research, wireframing and prototyping for clearer page structures and more intuitive navigation.

SKILLS
